

EYEBROW THREADING / EYEBROW & LASH TINTING

Threading is the perfect technique to transform any shape of brows into full, expertly groomed arches. It's what we like to call a precision hair removal technique and it involves the use of a twisted length of cotton that traps and uproots even the finest hair around your brow area. This age old technique effortlessly removes unwanted fuzz, leaving you with perfectly symmetrical sweepings brows. Is it painful? No, but expect your eyes to water a little.

Due to its accuracy, threading is also a brilliant way to remove unwanted hair from the face, neck, hands, feet and tummy. Your therapist will use a length of normal thread to ensnare your grown out eyebrow hair in a loop, before extracting them with a quick pulling action. Experienced threading therapists work at a fairly rapid pace. Don't be surprised if you're in and out of the chair in under 15 minutes! Of course if you want your brows tinted before you have them threaded, or have particularly overgrown brows it might take a little longer.

Tinting is a form of hair dye developed for specific use on the eyelashes and eyebrows. Eyelash tinting produces a similar effect to mascara. It visibly lengthens, darkens and thickens the appearance of eyelashes without smudging, clotting or rubbing off. Ideal for when you're on holiday on the beach, or at a spa day.
